

**Computer Science Department**  
**California State University, Fullerton**

CPSC 240 Computer Organization and Assembly Language  
Final-Exam Example  
Tuesday, December 16, 2025

Student Name: \_\_\_\_\_

Last 4 digits of ID: \_\_\_\_\_

**Note:**

- University regulations on academic honesty will be strictly enforced.
- You have **75** minutes to complete this Exam.
- You can use calculator for the Exam.
- Close books, slides, and turn off the computer.
- Turn off or turn vibration your cell phone.
- Any content submitted after the due date will be regarded as a make-up exam.

1. What will be the **ah**, **al**, **sil** and **r10** registers after execution? What is in **lst**, **sum**, and **ave** variables before execution and after execution until the label “\_stop”? Show answer in hex, full register size. **Note**, pay close attention to the register sizes (8-bit, 16-bit, 32-bit, or 64-bit).

```
section .data
